NetServices Achieves Cisco Powered Accreditation

NetServices Plc announces that it has achieved Cisco Powered accreditation by establishing the resources and procedures to deploy, manage and support Cisco Powered Managed Connectivity and Cisco Powered Managed Security services.

A Cisco Powered designation recognises NetServices' investment in the tools and processes necessary to provide high-quality network-based [managed services](#). It also demonstrates that the Group's Cisco Powered Managed Connectivity and Cisco Powered Managed Security services have undergone and passed a rigorous third-party assessment.

The accreditation will enable NetServices to take advantage of Cisco resources to envision, build, market and sell the Group's managed services, contributing to market acceptance and adoption.

Mark Vickers, Chief Executive of NetServices, said: 'Cisco recommends services that are designated Cisco Powered to assure a high-quality, customisable service experience. The Group is extremely pleased to have achieved the highest level of recognition by Cisco for managed services. The designation provides confidence in the quality of The Group's expertise and compliments the existing portfolio of managed network solutions.'

Edison Peres, senior vice president of the worldwide channels go-to-market group at Cisco, added: 'By achieving a Cisco Powered designation, NetServices has made an investment in obtaining the training, skills and knowledge necessary to play a pivotal role in meeting this increasing demand.'
