NetServices Achieves Cisco Powered Managed Services Designations

NetServices Plc announced today that it has achieved Cisco Powered designations by establishing the resources and procedures to deploy, manage and support Cisco Powered Managed Connectivity and Cisco Powered Managed Security services.

Mark Vickers, NetServices CEO commented “Cisco recommends services that are designated Cisco Powered to assure a high-quality, customisable service experience. We are extremely pleased to have achieved the highest level of recognition by Cisco for managed services. The designation provides confidence in the quality of our expertise and compliments our existing portfolio of managed network solutions.”

A [Cisco Powered](#) designation recognizes a solution provider’s investment in the tools and processes necessary to provide high-quality network-based [managed services](#). It not only acknowledges that the [managed service provider](#) has invested in industry-leading Cisco solutions, but also entitles the solutions provider to take advantage of Cisco resources to envision, build, market and sell its managed services, contributing to market acceptance and adoption.

“Adopting managed services allows companies to align IT and business goals, enabling them to focus scarce internal resources on their core competencies while servicing day-to-day IT infrastructure and operational needs through technology delivered as a service,” Edison Peres, senior vice president of the worldwide channels go-to-market group at Cisco. “By achieving a Cisco Powered designation, NetServices has made an investment in obtaining the training, skills and knowledge necessary to play a pivotal role in meeting this increasing demand.”

In addition, NetServices’ participation in the [Cisco Managed Services Channel Program](#)

indicates that its Cisco Powered Managed Connectivity and Cisco Powered Managed Security services have undergone a rigorous third-party assessment and have met requirements based on the Information Technology Infrastructure Library® (ITIL) framework of best practices and market and industry requirements.

NETSERVICES PLC

www.netservicesplc.com

NetServices Plc is a Manchester based, innovative Managed Services provider, specialising in providing services based around comprehensive networking solutions.

NetServices holds a unique position in the UK network service provision market, owning its own network infrastructure and managing its [own data centre](#), which connects into its nationwide Quality of Service (QoS) enabled core network. All solutions are provisioned to include our dedicated operational support as standard.
